Height: 127 cm
Weight: 39 Kg

L300 Stretch machine

- Oversized steel structure: providing solid support under any weight.
- Three layer coating. The design of this professional, up-to-date, stylish system is enhanced still further by its -layer coating comprising an initial anti-corrosion primer, for guaranteed durability, followed by an epoxy powder layer.
- Structure raised 50mm above floor level with rubber tipped feet. This provides access for cleaning and vacuuming without scratching the paint.
- **4 mm thick ST-37 / 40 steel frame. High durability.**
- **Round edges** with elliptical section in order to avoid cuts and knocks.
- Injected core fireproof seat. Unlike the classic foam padded particle boards, the injected core offers the advantage of uniformity, anti-distortion and greater anti-bacterial protection.
